

Fachvortrag **KINESIOLOGY**

Mittwoch, 21. Februar 2018 um 18:30 Uhr

kinesiology is a system that evaluates structural, chemical, and emotional aspects of health using manual muscle testing:

- Can check for bacteria, virus, yeast & parasite
- Strong emotional imbalance or trauma
- Physical injury, poor diet & negative thoughts
- Toxicity, hypo-functioning of organs/glands and/or metaphysical/spiritual issues.
- Kinesiology may help you find mysterious cases.
- It is precise and scientific!

In medical practice there are two key parts: the diagnosis (identifying and/or naming the “disease” or syndrome) and the treatment (drugs, surgery, etc.).

Kinesiology Testing does not diagnose or treat disease but it also has two parts: the analysis and the personalized health improvement program (using Mesquite’s Plan All - in One Wellness Program that includes treatment, nutrition and emotional stress release).

The analysis is performed simply by using your body’s own muscle group in combination with acupuncture points to determine where the underlying weakness is in the body and then, using the same technique we design a natural health improvement program to help you handle what we find in the analysis.

Arturo Mesquite's passion is helping people get to the root cause of their health issue, treating malnutrition, removing trauma and physical pain from the body with the purpose of reconnecting you to their optimal self, promoting vitality and happiness in every aspect of your life.

Referent: Arturo Mesquite, int. Wellnesspraktiker / Ernährungscoach
